

## Smart Conference Terminal

- Uncompressed, lossless restoration
- No driver or software setup required
- No latency, 28G/s bandwidth
- Interference-free wireless point-to-point transmission

## Easy Share series

EST-W4K-A8M EST-W4K-A8P EST-W4K-A8

## Easy&PRO meeting

### All-in-one conference terminal for easy, professional, and simple hybrid meetings

Easy Share series conference terminal enables easy interaction across various meeting and video conferencing platforms. For users, these simple operations offer a streamlined experience, professional quality, and high compatibility.

#### Effortless

Simply connect a full-function Type-C cable to your laptop and start the meeting.

#### Professional

Type-C interface supports 4K@30Hz<sup>①</sup> audio and video wireless sharing, 90W<sup>②</sup> power and networking.

#### Efficient

With Host functionality, it supports wired audio/video sharing and USB 3.2 Gen1<sup>③</sup> expansion.

#### Pure

Array omnidirectional microphone with noise reduction and echo cancellation algorithm, enhancing the immersive conference sound.

## Simple to use & powerful features

### Built-in professionally tuned omnidirectional microphone amplification

Clear and natural communication between participants is ensured through full-range speakers, echo cancellation, background noise reduction, and professional algorithm-based array omnidirectional microphones.

### Eight-in-one professional expansion interface

High-speed network interface with PD-powered Type-C, USB-A, HDMI input/output, and 3.5mm audio interface to enhance connection of various peripherals in meetings.

No software installation

No interference

No delay

No pre-configuration needed

## Plug and play Simple yet professional

### Highly compatible cross-platform design

Uses Type-C and HDMI for input signals, no need to consider operating systems or software/network support, plug and play.

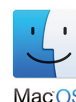

### Wide adaptability, user-friendly

No software or network support required, easily integrates into your existing system.

### Compact size with enhanced expansion

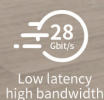

No longer restricted to dedicated spaces and complex device connections. Minimal operations and multiple interfaces make sharing easy and flexible.

Easy Share series wireless conference terminal is a powerful conference support product, capable of handling audio, video, and peripheral connections without the need for network or software support. It can integrate with various operating systems and conferencing platforms.

Connect and start,  
video conference made easy

## Easy Share series EST-W4K-A8M

Simply connect the Type-C cable to the terminal to start your meeting. The laptop screen automatically connects to the receiver, and you can select the terminal's microphone and speakers for a professional, efficient video conference!

### Safe, high-speed 4K wireless sharing

Wireless sharing up to 4K30Hz with millimeter-wave high-speed security technology, no delay, anti-interference, no software or network required.

### Built-in professional omnidirectional microphone amplification

Echo cancellation and effective noise reduction, with a 4-array omnidirectional microphone and enhanced human voice speakers, make the meeting sound immersive.

### Eight-in-one multi-port expansion

Provides HD audio/video input/output, high-speed USB connection, PD power supply, high-speed network, and independent audio output.

Note: EST-W4K-A8 does not feature integrated omnidirectional microphone amplification compared to EST-W4K-A8M.

**Larger environments  
and more participants?**

**Video conference made easy**

The wireless connected omnidirectional microphone amplification slave device helps complete the task!

## Easy Share series EST-W4K-A8P

Simply connect the Type-C cable to the terminal to start your meeting. The laptop screen automatically connects to the receiver, and you can select the terminal's microphone and speakers for a professional, efficient video conference!

Low latency

### Safe, high-speed 4K wireless sharing

Wireless sharing up to 4K30Hz with millimeter-wave high-speed security technology, no delay, anti-interference, no software or network required.

### Built-in professional omnidirectional microphone amplification

Echo cancellation and effective noise reduction, with a 4-array omnidirectional microphone and enhanced human voice speakers, make the meeting sound immersive.

### Professional omnidirectional microphone amplification wireless slave device

Same quality professional algorithm, with a 4-array omnidirectional microphone and enhanced human voice speakers in the slave device, wirelessly connects to the host for clear amplification and accurate pickup in larger venues.

### Eight-in-one multi-port expansion

Provides HD audio/video input/output, high-speed USB connection, PD power supply, high-speed network, and independent audio output.
